

RiskWi\$e Field Walk

– the National Risk Management Initiative

Thursday 5 Oct - 4.30pm

786 McPhersons Road, Katamatite, VIC 3649

(Courtesy of Andrew McPherson)

Join FAR Australia's Nick Poole and Ben Morris in the field – Looking at Risk and Reward with Fungicide Management

This field walk will provide you with an opportunity to look at powdery mildew trials. Please bring along your powdery mildew samples for resistance testing.

Powdery Mildew instructions: collect plants as close to field day as possible. Dig out whole plants with roots attached to a soil ball. Place whole plant in a plastic bag with enough water to moisten soil. Include name, contact details, variety and location.

CORPORATION

RiskWi\$e (the National Risk Management Initiative), is a 5-year national initiative of around \$30 million that will run from 2023 to 2028. It seeks to understand and improve the risk-reward outcomes for Australian grain growers by supporting grower on-farm decision making.

The session will conclude at 6pm with light refreshments.
