

– the National Risk Management Initiative

Are you ready to take your farming operation to the next level? If so, join us for a hands-on "Dirt, Diesel, and Dice" field day and workshop designed exclusively for forward-thinking farmers like you.

N Bank and Fungicide Decision Tree

- FAR Australia is developing a decision support tool to guide fungicide applications.
- What are the lines in the sand for fungicide application?
- See how strategies and tactics can be applied across wheat and barley to maximise profit while reducing the risk of fungicide resistance.

Dirt, Diesel and Dice

- FAR Australia are developing a tool to analyse three separate parts of a grain business – Land, Machinery and Crop inputs.
- How does investing in farm-land help buffer against seasonal variation in your grain business?
- Is your investment in machinery justified?
- Are you optimising your crop inputs to balance risk and reward?
- questions on farm risk and reward. See how adjusting your investment in Dirt, Diesel and Dice can impact your risk profile and profitability.
- What are the implications for new and existing farmers as well as succession planning?

Bring along your thinking cap and big picture questions on farm risk and reward.

When?

Tues 17 September 24
4.00pm – 8.30pm
