

SPRING FIELD DAY: *DAYSDALE AND BALLDALE*

Monday 23rd September 2024

DAYSDALE 9am to 12noon

GPS -35.675133, 146.356799

Signposted off Hanrahans Road

Kindly hosted by: Peter Hanrahan

BALLDALE 2pm to 4pm

GPS -35.472811, 146.251006

Signposted off Balldale-Coreen Road

Kindly hosted by: Ed Nixon (Optimus Ag)

FAR Australia invites you to attend our Daysdale/Balldale Spring Field Day where we will showcase a range of GRDC investments in wheat, barley and grain legumes.

FAR Australia presenters include Tom Price, Ben Morris and Nick Poole.

GUEST SPEAKER:

Jason Condon
Associate Professor
in Soil Science
Charles Sturt University

Jason is a practical soil science researcher with an interest in real world soil issues, communicating an understanding of agronomically relevant soil mechanisms to end users, and raising the awareness of soils within the broader community.

Come and inspect a variety of research trials where topics of discussion will include:

- Comparisons of pulse species for grain yield and nitrogen fixation – Including varieties of faba beans, lupins, field peas, vetch, chickpeas, and lentils.
- Fungicide management strategies in faba beans.
- pH stratification and the implications for pulse productivity
- Comparison of new main season wheat and barley varieties being evaluated in FAR Australia's Germplasm Evaluation Network.
- Management options for control of wheat powdery mildew in Southern NSW – Variety choice, fungicide products, and strategic use of new actives in the fungicide program.

Please bring along your WPM samples for fungicide resistance testing
