

VARIETY RESULTS OUT NOW: PROVISIONAL HARVEST YIELD RESULTS 2024/25

(WA, VIC, SA & NSW)

Industry Innovations Germplasm Evaluation Network (II GEN)

13 January 2025

Interested in crop variety performance with and without disease management? Check out the latest variety results now.

The Germplasm Evaluation Network (GEN) is a FAR Australia 'Industry Innovations' initiative that tests crop variety performance across FAR Australia's national network of Crop Technology Centres. GEN sites independently test variety performance with and without fungicide. FAR Australia provides the control varieties and breeders enter their chosen lines for evaluation.

Provisional results documents can be accessed by clicking on the following links:

[Wheat performance in the MRZ of South Australia \(Bordertown\)](#)

[Wheat performance in the HRZ of Victoria \(Gnarwarre\) – April sowing](#)

[Wheat performance in the HRZ of Victoria \(Gnarwarre\) – May sowing](#)

[Wheat performance in S NSW \(Wallendbeen\)](#)

[Wheat performance in the HRZ of WA \(Frankland River\)](#)

[Canola performance in the HRZ of Victoria \(Gnarwarre\)](#)

[Canola performance in the HRZ of SA \(Millicent\)](#)

[Barley performance in the HRZ of WA \(Esperance\)](#)

[Barley performance in the HRZ of SA \(Millicent\)](#)

[Barley performance in the MRZ of SA \(Bordertown\)](#)

Attention Breeders! Should you be interested in taking part in our Industry Innovations initiative in 2025, please contact Rachael Black 0427 142 033 rachael.black@faraustralia.com.au.

2025 Prospectus out shortly – now including milling oats.
